## EXPERIENCE

### Prime Vision, Delft — *Full Stack Developer*

AUGUST 2018 - PRESENT

As a Full Stack Web developer at Prime Vision, I am developing Web Applications for PostNL, DHL and other customers. We are using Agile software development methodology with daily stand-ups and all other Agile components. I am using Git, SVN, Jira, Redmine, Jenkins for different projects.

### Restart Network, Rotterdam — *Volunteer Lecturer*

JUNE 2018 - PRESENT

After finishing my bootcamp, Restart Network offered me an opportunity to help people like me with Live-Coding sessions and Master Classes. I am giving weekly lectures about Node.js, PHP and other Fundamentals of Web Development make them pass their challenges.

### Picnic Supermarket, Amsterdam— *Web Developer Intern*

JUNE 2018 - AUGUST 2018

I found an internship opportunity when I was finished my bootcamp. While I was doing my Internship I got a good offer and I accepted.

### Tesbihane, Amsterdam— *Bussiness Analysts & Web Developer*

OCTOBER 2016 - MAY 2017

One of the biggest jewelry companies in Turkey was trying to improve their European website. It was sort o startup project. I was responsible to review clients feedbacks and improve the website by adding new features and designs. I worked as a mix of Web Developer and Bussiness Analysts.
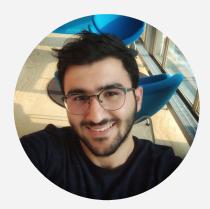

### Ilgi Schools, Turkey— *Teacher*

JUNE 2016 - SEPTEMBER 2016

After graduated from Theology, I started to work as a Teacher in Ilgi Schools. I learned a lot about the work environment and time management by creating class agendas and lesson plans.

### Freelance, Turkey— *Amateur Web Developer*

JUNE 2014 - JUNE 2016

Since my childhood, I was curious about web technologies and this drove me to work with it. It wasn't a professional job, only Wordpress. The others were static websites that contain just HTML and CSS. It was an extra job I did while I was studying at University.

SEPTEMBER 2011 - JULY 2016

- Learned during Philosophy and Sociology to understand human history.
- Found the opportunity to develop thinking level and gained critical thinking skills.

## PROJECTS

### Power2DM — *European Union Subsidy Program*

Predictive model-based decision support application for diabetes patient empowerment. I am responsible with Shared Decision Making Application.

### 4kCode — *An International Website with Next.js*

A website with four different languages and server-side rendering designed, created and hosted by me on DigitalOcean.

### Pırlanta Ara — *Progressive Web Application*

The application is to search in books with four different algorithms. It's installable on mobile devices because of PWA.

### Hand coding — *Web Application for PostNL*

A platform to print labels by searching address and retrieving different services. The app is created with JS and Web Components.

*Please do not hesitate to visit my website to see all projects with detailed descriptions.*

❖ Ability to look at the problems from different angles than the conventional way and come up with new solutions.
